Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- 4) ☐ Interview Summary (PTO-413) Paper No(s). ____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
2. This application does not contain an abstract of the disclosure as required by 37 CFR 1.72(b). An abstract on a separate sheet is required.
3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Thiele. The Thiele reference discloses the utilization of an acoustic range measuring device that transmits two frequencies as recited in the aforementioned claim.
5. Claims 1 and 3-7 are rejected under 35 U.S.C. 102(b) as being anticipated by Furuno et al. The Furuno et al. reference discloses the utilization of a range measuring device that transmits two frequencies the echoes of which are compared (see abstract), combined (see Fig. 4) and control means as recited in the aforementioned claims.
6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3662

7. Claims 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Furuno et al. in combination with Cherek et al. The Furuno et al. reference discloses the utilization of a range measuring device that transmits two frequencies as recited in the claim. The difference between the Furuno et al. reference and the claim is that the claim recites the utilization of a frequency that renders the radiating surface of the transducer self cleaning. The Cherek et al. reference teaches that it was well known in the art to utilize a frequency that renders the radiating surface of the transducer self cleaning. It would have been obvious to modify the Furuno et al. reference to utilize a frequency that renders the radiating surface of the transducer self cleaning as motivated by the Cherek et al. reference to enable the Furuno et al. system to be self cleaning.
